Spotlight: August is National Breastfeeding Month

- In a [recent report](#) on breastfeeding and racial disparities, the CDC noted that strategies for increasing breastfeeding rates among Black women included improving peer and family support. NICHQ’s article, “Breastfeeding Takes a Village and, Too Often, Black Women Don’t Have One” examines the value of peer breastfeeding support for black women in filling in the gaps of historical and systemic inequities.

- According to the National Institute for Children’s Health Equity (NICHQ), health professionals can’t provide *meaningful* education that speaks to each mother’s individual views without hearing directly from mothers. The article, “A Better Approach to Conversations about Breastfeeding”, provides insight on communication with mothers who are breastfeeding.
